

Quiet confidence. Deep water, Gulf sand.

A visual direction for Key Dolphin: the **restraint and authority of an advisory firm** (Keystone), the **ultra-minimal, type-led clarity of a modern AI studio** (Zachs AI), grounded in a **Gulf palette**—deep ocean navy, electric cobalt, and the warm desert sand of the Gulf.

KEYSTONE (KEYSTONE.AI)

SERIOUS TECH + ADVISORY · PROBLEM→APPROACH→PROOF · CREDIBLE RESTRAINT

ZACHS AI (ZACHSAI.COM)

PURE BLACK/WHITE · BIG LIGHTWEIGHT TYPE · ULTRA-MINIMAL · RTL-CLEAN

THE DIRECTION — IN THREE MOVES

01 / POSTURE Established, not loud Present with the polish and rigour of a firm that has its act together. Whitespace over decoration. We look established before we are large — buyers of trust judge us in the first five seconds.	02 / SYSTEM Type does the work Big, lightweight grotesk headlines. Mono labels for structure and technical credibility. One geometric mark. No gradients-as-decoration, no stock illustration, no clutter.	03 / FEELING Deep water, clean light Ocean navy and cobalt carry authority and the dolphin story; warm sand neutrals keep it human and premium rather than cold SaaS. Privacy-first calm, not hype.

BODY · INTER Key Dolphin builds and runs done-for-you automation for businesses that can't afford to leak data or miss a customer. We present with the polish and restraint of an advisory firm, and deliver like a modern AI studio. Clear problem, clear approach, credible proof.	LABELS · SPACE MONO / UPPERCASE 01 — DISCOVERY / 02 — BUILD / 03 — RUN Tracked mono captions structure the system — section numbers, technical tags, metric labels. Borrowed from the reference brand books and Zachs' credibility strips. DUBAI · GCC · REMOTE-FIRST

MARK DIRECTION — ONE GEOMETRIC SYMBOL

Direction only, not final logos. Bold, contained, monochrome geometry — an abstract dolphin arc / key that survives at favicon size and flips cleanly for RTL. Same restraint as the monogram grid in the references.

PRINCIPLES — HOW IT SHOULD FEEL

- DO

Lead with a strong problem statement, then approach, then proof — the Keystone rhythm.
- DO

Let whitespace and large light type carry the page.
- DO

Use mono labels + real metrics (e.g. "37.5 hrs → 5 min") for credibility.
- DO

Keep cobalt as an accent against a calm cream/navy base.
- DO

Design mark & layout to flip cleanly for Arabic RTL.

- DON'T

Read like a bright, generic SaaS app ("your AI front desk").
- DON'T

Use decorative gradients, glows, or stock 3D illustration.
- DON'T

Crowd the layout — more than one accent colour per view.
- DON'T

Draw a cute literal dolphin; keep the mark abstract & geometric.
- DON'T

Mix more than two type families (grotesk + mono).
